

OUR PRODUCTS

Legacy Block is made of a mixture of recycled Styrofoam, cement and a cementitious binder. The excellent physical properties of Legacy Block mix, combined with the structural integrity of the concrete and steel grid make Legacy Block the best building product on the market.

TWO BLOCK TYPES MAKE A COMPLETE SYSTEM:

- The standard Block for regular walls.
- The End Block for corners, lintels, and wall ends.

Panel Sizes: 15" or 30" tall by 10 feet long
Wall Thickness: 8.5", 10", 12" or 14"
End Blocks: 7.5" wide for 10, 12, 14 thick walls
Flat Blocks: 2" and 3 5/8" thick.

WHY CHOOSE US

Legacy Block Inc produces a high quality, cost- effective building material that is easy to use for both Contractors and a do-it-yourself Builder.

When you build with Legacy, you build for your life & that of future generations!

- Reduces over-all costs to build
- More cost-effective to erect 100 sq. ft. wall section erected in less than 1 man hr. compared to CMU Block which averages 9 man hours.
- Curved walls & arched openings are easy
- Accepts plaster & stucco directly
- Engineered to seismic zone 4, Class D
- Withstands category 5 hurricane and tornado winds
- Superb sound insulation
- Noncombustible, 5 hour rating
- Impervious to termites, rodents & mold
- Able to pour full wall height in a single pour
- Masonry trade labor or framers not required
- Block installation crew and tech support as requested

WHO WE ARE

Legacy Block is a superior Insulated Concrete Form utilizing 85% recycled content. It is so strong that it can withstand category 5 hurricane force winds, 8.5 seismic events and is resistant to termites, rodents and mold. Legacy Block will provide outstanding sound and temperature insulation so utility bills are often reduced as much as 50%. Our Block also allows for unlimited architectural freedom in design and is fast and very cost-effective to erect; as experienced masonry labor or framers are not required.

The predecessor to Legacy Block was developed in Europe over forty five years ago. This type of ICF has continually been improved and enhanced, so you can be confident that you are getting the best ICF on the market today.

Legacy is produced under strict quality control guidelines and is continuously tested for both its physical and structural parameters. Hence our tag line!

“BUILD WITH STRENGTH – BUILD FOR LIFE“

Legacy Block offers LEED credits and has been reviewed by ICBO and ICC.

OUR DESIGN

Legacy Blocks are large blocks with a grid of internal channels that can be used either horizontally or vertically. Legacy Blocks are joined together to form a story-high wall. Channels are then filled with concrete and re bar. The channels in each block form a continuous secure structural grid which gives Legacy Block its superior strength. Variation of the concrete formulation and the amount of reinforcement allows Legacy Block load bearing capacities to be adapted to almost any application. Legacy Block walls serve as an excellent sound and thermal barrier as well as being 5 hour fire rated.
